

For business users

Supercharge your visual analytics

Data is getting created at a faster pace than ever. However, to uncover game-changing business insights requires a platform that makes understanding data easy and that provides answers lightning fast. Together, Yellowbrick and Tableau deliver the fastest visual analytics platform, enabling you to get deeper insights and in real-time.

Yellowbrick is a next-generation cloud data warehouse designed from the ground up for modern analytics and it offers the best performance and economics in the industry. With Yellowbrick and Tableau, you can explore your data and see results instantly. Get richer insights by consolidating data from existing silos as Yellowbrick delivers real-time analytics on terabyte to petabyte scale data sets. But more importantly, and as many top brands have done so, Yellowbrick and Tableau enable you to transform your business and gain a competitive edge.
