

For IT

Build the fastest visual analytics stack

Your business users rely on analytics and insights derived from data to drive growth. However, existing data warehouse solutions limit how quickly users can analyze data and create silos that only offer a narrow view of the business. With Yellowbrick and Tableau, you can deliver the fastest visual analytics platform, enabling your business users to get deeper insights and in real-time.

Yellowbrick is a next-generation cloud data warehouse designed from the ground up for modern analytics and it offers the best performance and economics in the industry. With Yellowbrick and Tableau, your business users can run dashboards 100X faster and visualize data in real-time across billions of records. Yellowbrick offers the best performance in the industry at a fraction of the cost and it's available in fixed-price subscriptions. And whichever is your preferred deployment model, Yellowbrick supports them all: private cloud, public cloud, at the edge, or any combination.

Industry-leading performance

Yellowbrick offers the fastest data warehouse in the industry with an architecture optimized for modern analytics.

Unbeatable economics

Yellowbrick delivers over 100X faster performance than other solutions and supports hundreds of users at a fraction of the cost – and its available in fixed-price subscriptions.

Full deployment flexibility

Yellowbrick provides full deployment flexibility. Deploy in private or public clouds, at the edge, or any combination.
